# Daisy MacLennan

## FRONT END DEVELOPER

### ABOUT ME

I am a **perfectionistic** front end developer with a passion for problem solving and pretty websites! I love web design, and I get so much satisfaction from delivering on a project that's both aesthetically pleasing and optimised for the user. I am looking for a position within a company that has the same enthusiasm for creating innovative and clean end products as I do.

### EMPLOYMENT HISTORY

#### Software Engineer, Accedo

Remote/London

Building accessible video streaming interfaces in **React.js** for use on **remote controlled devices** such as **Smart TV's** or **gaming consoles**. Making use of **Android Studio** for testing purposes. Optimising the codebase to ensure optimum experience on legacy devices.

#### Front End Developer, Huler

Remote

Building complex user interfaces in **React.js**, **Next.js** or **Vue**. Bringing bespoke designs to life using animation libraries such as **Framer Motion** or **React Spring**. Investigating and solving bugs from the QA team. Self managing tasks and communicating updates in Jira. Independently working to improve the general condition of our codebases including the conversion from **JavaScript** to **TypeScript** of one of our larger systems.

#### Software Engineer, Distinction

Remote/Nottingham

Responding to tickets, giving updates and discussing new features with retainer clients. Applying bug fixes and adding new pages/features in **Kentico CMS**, **WordPress** and **Vue.js**. Assisting project manager in planning a high value project using **Jira**. Leading in the creation of user stories for a high value project. Applying bug fixes and adding new pages/features using **Kentico CMS**.

#### Apprentice Developer, Si digital

Portsmouth

Facilitating and formatting requirements in an **agile** manner. Developing accessible user interfaces to fit a design specification using **WordPress**, **React.js**, **Gatsby** and **Next.js**. Designing and developing **mySQL** databases to be suitable for a websites needs. Implementing new features to existing websites. Building **RESTful** API endpoints to retrieve and store data.
